---

## PROJECTS

### My Internet Smart Systems (MISS)

Home automation project using Bluetooth and AWS IoT Core for controlling appliances. Includes a smart geyser that heats water based on temperature. Technologies: HTML, CSS, MIT App Inventor.

### Study-Sync

Productivity app focused on time management and task organization. Features an engaging UI with customizable backgrounds, a Pomodoro Timer for work intervals, and secure user authentication for data protection.

### Netflix Clone (Frontend)

Designed and implemented the user interface of a streaming platform clone, including content browsing, playback controls, and user authentication. Technologies used: HTML, CSS, JavaScript.

---

## EXPERIENCE

### Bharat Intern (Web Development Intern)

August 2024 – Present (Virtual)

## ACHIVEMENTS & HOBBIES

**Athletics:** Achieved gold, silver, and bronze medals in relay events for five consecutive years.

**Music:** Passionate about singing, demonstrating dedication to musical proficiency.
